### PERSONAL PROFILE

I am a UX Engineer with multiple years of experience building beautifully efficient user-focused interfaces with various front-end frameworks like ReactJS

### WORK EXPERIENCE

**Software Engineer**

MicroFocus Interset                                    Present

- Implemented front-end interface that allows enterprise threat hunters to find anomalous/risky activity
- Principally worked in ReactJS with MobX

**Frontend Engineer**

Kweeve                                    Jan 2018 - June 2019

- Built and maintained admin dashboard to allow not-for-profit organizations to manage donations
- Worked with ReactJS, TypeScript, and Firebase

**Web Developer**

WebDrive                                    Nov 2017 - Oct 2019

- Built and maintained websites for medium- to large-scale institutions
- Worked with CMS like WordPress and Drupal

### OTHER PROJECTS

**Trackmate**

An order-tracking admin interface for small businesses                                    May 2019

- Built with ReactJS and Firebase

**Giphy 2.0**

Find and use gifs                                    June 2019

- Built with ReactJS
